

Organizing and Implementing an Incident Response Plan

PURPOSE

The purpose of this guide and template is to provide an outline of action and reaction steps during a crisis or incident. The utilization of both the template and guide is fluid and to be implemented at the discretion of the company. This plan can be scaled to fit the needs of larger corporations.

BACKGROUND

All government agencies are mandated to use a standardized, all-hazards approach and organizational structure when responding to incidents. This approach is called the Incident Command System (ICS).

This template and guide was designed by Georgia Tech Research Institute in conjunction with U.S. Poultry & Egg Association and United Egg Producers. Subject matter experts from Georgia Tech Research Institute's Socio-Technical Systems Division (GTRI-STSD) and Georgia Emergency Management Agency/Homeland Security (GEMA/HS) provided technical support. The model was created in Microsoft Excel, a familiar and cost efficient format.

INCIDENT MANAGEMENT TEAM GUIDE

Although the private sector is not required to use the Incident Command System structure, companies that are at least familiar with the system are in a better position to anticipate and coordinate with responding agencies. It is recommended that companies establish an Incident Management Team (IMT).

INCIDENT COMMAND SYSTEM

The Incident Command System is organized in five basic sections, with provisions for other positions as the level or complexity of incident warrants. The five basic sections are Command, Planning, Operations, Logistics, and Finance/Administration, and the ICS may also include other positions that deal with Incident Safety and Public Information. The core responsibility of each section is as follows:

- **Command (directs all other sections)**
 - Chain of command; establish duties
- **Planning**
 - Create Incident Action Plan (IAP)

- **Operations**
 - Carry out IAP
- **Logistics**
 - Provide facilities, equipment, personnel, services
- **Finance/Administration**
 - Track and manage expenditures, losses, reimbursement
- **Other Positions**
 - Incident Safety Officer
 - Public Information Officer

Ideally, to parallel the ICS structure, a poultry or egg company Incident Management Team would include:

- Someone with final managerial authority
- Someone to develop and coordinate response plan
- Someone to be primarily available to government agencies and responders
- Someone to be a liaison to suppliers and customers
- Someone to be a liaison to the public
- Someone to direct personnel and safety
- Someone to track losses, incident expenditures and reimbursements

Note: *While a large company with an extensive workforce might be able to assign sufficient personnel to these various roles, a single, smaller company/farm may not. With a much smaller workforce, multiple roles would have to be performed by one person, if at all. Such companies would have to draw upon external or industry resources, recognizing that they are part of an industry with overall interests in common; the single company is not isolated.*

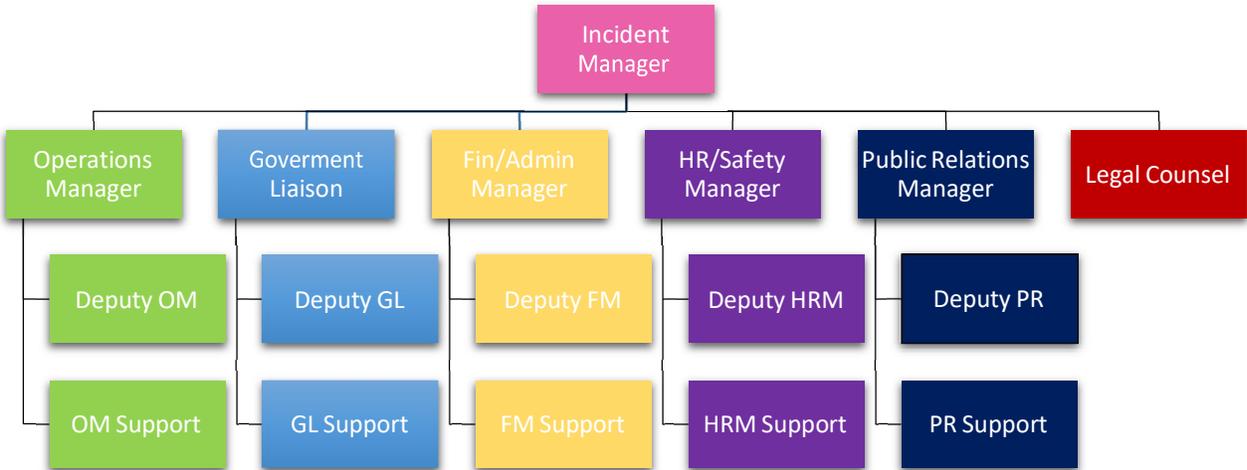

Incident Command System and Incident Management Team Equivalent Positions

| ICS Position | Proposed IMT Equivalent |
|----------------------------------|--------------------------------|
| Incident Commander | Incident Manager |
| Planning Officer | ALL |
| Operations Officers | Operations Manager |
| Logistics Officer | Government Liaison |
| Financial/Administration Officer | Finance Manager |
| Incident Safety Officer | HR/Safety Manager |
| Public Information Officer | Public Relations Manager |
| | Legal Counsel |

The basic organizational chart below shows the Incident Manager as the overall coordinator of a team of six sections: operations, government liaison, finance/administration, HR/safety, public relations, and legal counsel. As previously mentioned, the project team recognizes that only large corporations would likely be able to staff each section independently. Smaller companies/independent farms would necessarily assign multiple roles to some of the same people. That which is reflected below identifies an ideal, in which each section including the

Incident Manager would have a deputy to assume responsibility if the primary section manager were temporarily unavailable/otherwise engaged, and each section would also have at least one administrative support person. It is assumed that legal counsel would be a law firm with its own staff.

Some incidents can be highly complex, with numerous ongoing tasks to reach resolution. Incidents are rarely predictable, and thus it is probable that all members of the IMT will not be on site when an incident first occurs, or the members might be delayed or otherwise out of contact. Thus it is crucial that a company considers what secondary person(s) could step in as needed.

INCIDENT CATEGORIES AND TYPES

The template itself is generalized to allow breath of application as well as help companies to populate the template in different ways. There are tabs within the template that allow companies to cross-reference contacts and incident types in a matrix. Companies are able to modify the tab to streamline the most common incidents they are likely to face or expand it to include other possible incidents. Six basic, representative categories and sixteen proposed sub-types are listed below.

- **Contamination**
 - Biological
 - Chemical
 - Radiological

- **Disease**
 - Infectious Disease
- **Natural Disaster**
 - Fire
 - Flood
 - Tornado
- **Public Relations**
 - Protest
 - Consumer
 - Customer
- **System Failure**
 - Equipment
 - Utility
 - Information Technology
- **Criminal**
 - Theft
 - Violence
 - Sabotage

When an incident strikes, it is unlikely that all critical personnel would be at or able to get to the incident site. This is especially true of larger corporations with multiple plants or farms in multiple locations, sometimes multiple states. The modern company is heavily reliant on cellular communications and Internet connectivity. Without everyone able to convene in the “war room” of old, other considerations are necessary to keep everyone involved “on the same page” to respond quickly and efficiently.

If all critical personnel are on site, gathering in a “war room” for planning and updates and circulating paper copies of the same is sufficient. For the smaller facility this is the best option.

For more complex incidents involving multiple sites with personnel in various locations, it is recommended that the Incident Management Team(IMT) view/use the planning and management template as follows:

- Establish regular meeting time/place at the onset of incident for team updates
- Work from a single copy of the template that is continuously updated and not forwarded by email with each update; rather:
- Keep the single version on a remote, password protected server into which members of the Incident Management Team can log as needed or at team update times. Google Sheets is a good example of a free mechanism for the same.
- Each IMT section should log its own information and activity or one or two designees should keep the master file updated.
- It is desirable/advisable for all team members to review what each group is doing or has done without having to wait for meeting times.

- Recognize that this isn't realistic for all size companies. For many companies a single paper copy will suffice.
- Recognize that communications lines might be down or go down during the incident, in which case the "war room" model and paper copies are always an acceptable fallback.

GOOGLE SHEETS

Google Sheets is a free online spreadsheet powered by Google. Users can upload, edit and view spreadsheets in real time. Useful to being out in the field is ability to access Google Sheets from a smart phone application. This system can allow the IMT to stay up to date, encourage timeliness and communication. A requirement of using Google Sheets is that a gmail account is required to edit spreadsheets.

INCIDENT MANAGEMENT TEMPLATE

The Incident Management Template serves to help the companies organize their thoughts, plans, personnel, resources, and actions to address important questions very quickly and efficiently. These questions will include the following:

- What do we need to do? (to keep operating or get back up and running)
- How do we keep it from getting worse?
- What do we need?
- Who do we call?

TEMPLATE TABS

Incident Brief.

This brief functions as a snapshot/executive summary of the incident and identifies core objectives, tasks, and needs. As a summary, it is not meant to go into details of a sensitive nature. As such, it would be a useful page to print off for government responders. As more information is known about the incident, this tab should be updated, i.e. it is a "living" summary.

| INCIDENT BRIEF | | | | | | | Note: Use this tab to create an executive summary of the incident to inform incident action plan. | |
|--|------|---|----------------|--|--------------------|-------|---|---|
| INCIDENT TYPE | DATE | TIME | STREET ADDRESS | | CITY | STATE | ZIP CODE | |
| | | | | | | | | |
| FACILITY NAME | | | | | LATITUDE/LONGITUDE | | | |
| | | | PHONE: | | FAX: | | | |
| (Note: List all types of impact related to the same incident (e.g. a tornado might also cause fire, system failure, bio contam.) | | | | | | | | |
| INCIDENT SUMMARY | | | | | | | | Note: Text will begin at bottom of box and fill upwards as additional lines are entered. Expand as necessary. |
| | | | | | | | | |
| IMMEDIATE OBJECTIVES | | Note: These objectives constitute the core of the Incident Action Plan; expand as necessary. | | | | | | |
| Objective 1: | | | | | | | | |
| Objective 2: | | | | | | | | |
| Objective 3: | | | | | | | | |
| Objective 4: | | | | | | | | |
| Objective 5: | | | | | | | | |
| IMMEDIATE TASKS | | Note: These tasks should correlate to the objectives and form the core tasks of the IAP; expand as necessary. | | | | | | |
| Task 1: | | | | | | | | |
| Task 2: | | | | | | | | |
| Task 3: | | | | | | | | |
| Task 4: | | | | | | | | |
| Task 5: | | | | | | | | |
| Task 6: | | | | | | | | |
| Task 7: | | | | | | | | |
| IMMEDIATE NEEDS | | Note: Identify crucial equipment, personnel, and other anticipated support needs; expand as necessary. | | | | | | |
| | | | | | | | | |

Incident Management Team

This tab lists the contact information for the IMT members, identifies core roles and responsibilities for each position, and provides space for the Incident Manager to identify any additional roles and responsibilities specific to the incident that he or she deems necessary to assign. As mentioned earlier, a fully-staffed IMT in this proposal would have a deputy and support person for each role, and space is provided within the template for each. When there aren't sufficient personnel to staff each position separately, the same name should be entered for multiple roles as necessary. Each of the roles should be assigned, as each role is necessary to perform in effective incident management.

| INCIDENT MANAGEMENT TEAM Note: Establish IMT for each affected site/level (e.g. local, corporate) | | | | | | |
|--|---------------------------------|---|----------------|----------------|--------------|----------------|
| INIT. | TITLE | NAME | MOBILE | OFFICE | EMAIL | FAX |
| IM | INCIDENT MANAGER | John Doe | (000) 000-0000 | (000) 000-0000 | jdoe@abc.com | (000) 000-0000 |
| DIM | Deputy Incident Manager | | | | | |
| IMS | Incident Management Support | | | | | |
| OM | OPERATIONS MANAGER | | | | | |
| DOM | Deputy Operations Manager | | | | | |
| OMS | Operations Management Support | | | | | |
| GL | GOVERNMENT LIAISON | | | | | |
| DGL | Deputy Government Liaison | | | | | |
| GLS | Government Liaison Support | | | | | |
| FM | FINANCE MANAGER | | | | | |
| DFM | Deputy Finance Manager | | | | | |
| FMS | Finance Management Support | | | | | |
| HR | HR/SAFETY MANAGER | | | | | |
| DHR | Deputy HR/Safety Manager | | | | | |
| HRS | HR/Safety Management Support | | | | | |
| PRM | PUBLIC RELATIONS MANAGER | | | | | |
| DPRM | Deputy Public Relations Manager | | | | | |
| PRS | Public Relations Support | | | | | |
| LC | LEGAL COUNSEL | | | | | |
| PRIMARY ROLES/FUNCTIONS Note: IM to expand as needed to add additional roles and responsibilities specific to incident. | | | | | | |
| INCIDENT MANAGER: | | Coordinate IMT; coordinate with other IMTs; assign roles and responsibilities | | | | |
| Additional for this incident: | | | | | | |
| OPERATIONS MANAGER: | | Coordinate effort to restore or maintain production and production systems. | | | | |
| Additional for this incident: | | | | | | |
| GOVERNMENT LIAISON: | | Serve as primary contact for all local, state, and federal government agencies. | | | | |
| Additional for this incident: | | | | | | |
| FINANCE MANAGER: | | Track losses and expenditures; serve as liaison to suppliers and customers. | | | | |
| Additional for this incident: | | | | | | |
| HR/SAFETY MANAGER: | | Communicate with and ensure safety of employees and contractors; recruit support as needed. | | | | |
| Additional for this incident: | | | | | | |
| PUBLIC RELATIONS MANAGER: | | Prepare and present all written and recorded information releases to the public; host briefings | | | | |
| Additional for this incident: | | | | | | |
| LEGAL COUNSEL: | | Examine and address liability, contractual obligations, insurance, etc. | | | | |
| Additional for this incident: | | | | | | |

Incident Action Plan

The Incident Manager, in consultation with the entire Incident Management Team, will specify objectives and tasks/sub- tasks associated with each objective to address the incident. This constitutes the “marching orders” and is absolutely critical. To the extent possible, the company should pre-plan and pre- populate as much of this as possible based on anticipated scenarios to reduce response time when an actual incident happens. Also, it is expected that circumstances will change frequently during an incident that will require updating and adapting the Incident Action Plan. Thus, it is not firm and fixed. Post-incident, this tab will be an important document for debriefing and informing future planning/response.

The Incident Action Plan tab features a section for each objective and that objectives associated tasks and sub-tasks, a space (far right) to identify to whom each is assigned, and a space (left) to provide a reference code in a system of the company’s own choosing/design. The tab can extend indefinitely to be as comprehensive as desired.

| INCIDENT ACTION PLAN | | | | Note: Add blocks of objectives, tasks, and sub-tasks as needed and code by following example. |
|----------------------|----------------------------------|--|--|---|
| CODE | OBJECTIVE | TASK | SUB-TASK | ASSIGNED |
| OB1 | OB1: Summarize Objective 1 here. | | | |
| OB1AT1 | | AT1: Summarize Associated Task 1 for Objective 1 here. | | |
| OB1ST1a | | | ST1a: Summarize Sub-Task A for Associated Task 1 for Objective 1 here. | |
| OB1ST1b | | | ST1b: Summarize Sub-Task B for Associated Task 1 for Objective 1 here. | |
| OB1AT2 | | AT2: Summarize Associated Task 2 for Objective 1 here. | | |
| OB1ST2a | | | ST2a: Summarize Sub-Task A for Associated Task 2 for Objective 1 here. | |
| OB1ST2b | | | ST2b: Summarize Sub-Task B for Associated Task 2 for Objective 1 here. | |
| OB1AT3 | | AT3: Summarize Associated Task 3 for Objective 1 here. | | |
| OB1ST3a | | | ST3a: Summarize Sub-Task A for Associated Task 3 for Objective 1 here. | |
| OB1ST3b | | | ST3b: Summarize Sub-Task B for Associated Task 3 for Objective 1 here. | |
| INIT. | OBJECTIVE | TASK | SUB-TASK | ASSIGNED |
| OB2 | OB2: | | | |
| OB2AT1 | | AT1: | | |
| OB2ST1a | | | ST1a: | |
| OB2ST1b | | | ST1b: | |
| OB2AT2 | | AT2: | | |
| OB2ST2a | | | ST1a: | |
| OB2ST2b | | | ST1b: | |
| OB2AT3 | | AT3: | | |
| OB2ST3a | | | ST1a: | |
| OB2ST3b | | | ST1b: | |
| INIT. | OBJECTIVE | TASK | SUB-TASK | ASSIGNED |

| OB3ST3a | | | ST1a: | |
| OB3ST3b | | | ST1b: | |
| INIT. | OBJECTIVE | TASK | SUB-TASK | ASSIGNED |
| OB4 | OB4: | | | |

Contacts/Company, Contacts/Local, Contacts/State, Contacts/Federal

The contacts tabs perform two functions. Along the left side, the company can list the agencies/ organizations/clients it expects to engage in a given incident and provides for a contact number Next to each entry is also a “notes” space to enter information for a direct contact or other helpful information.

The contact tabs are, in part, a directory. Moreover, they constitute a “communications roadmap,” matrices that tell the IMT members WHO to contact for WHAT kind of incident.

Across the top of each matrix are six incident categories: Contamination, Disease, Natural Disaster, Public Relations, System Failure, and Criminal. Under the six categories are fifteen sub-categories: Biological, Chemical, and Radiological Contamination; Foreign Animal Disease; Fire, Flood, Tornado; Protest, Consumer Issue, Customer Issue; Equipment, Utility, or Information Technology failure; and Theft or Violence. Note that these are suggested incident categories, companies can expand, contract, or otherwise modify this list to best suit their needs.

For each kind of incident, the company can use the matrix to check/color in the box next to each listing that should be contacted in the event of that kind of incident. For example, if the incident type were “fire,” the box under the fire column and in the “County/Municipal Fire Department” would be checked/colored in. A note or reference code might be typed into the box as well.

When the matrix is filled out for each kind of incident, IMT members will be able to run down the column under the incident type that has occurred and be reminded, at a glance, who they have pre-determined needs to be contacted within the company, its market, and others at the local, state, and federal level.

It is crucial that the IMT take time well in advance of any incident to discuss each kind of incident, determine who they most likely would need to contact for each, and go ahead and pre- populate the matrices.

| CONTACTS, COMPANY | | Instructions: Modify matrix according to company/site more likely scenarios; fill boxes for call triggers. | | | | | | | | | | | | | | | |
|-----------------------|---|--|-----------|--------------------|------------------|-------|---------|------------------|----------|----------|----------------|---------|----|----------|----------|----------|--|
